

General Practitioners (GPs)

GPs oversee all aspects of patient care. They meet regularly with other members of the practice team to plan joint approaches to coordinate a patient's care. All other members of the practice team work under the supervision of a GP.

They can help with:

- » Diagnosing and treating a health condition
- » Ordering tests and interpreting results
- » Prescribing medication where necessary
- » Referring you to hospital and other medical services for urgent and specialist treatment
