NHS Sussex

BREAST SCREENING SAVES LIVES

SO SAY YES TO BREAST SCREENING.

THE RISK OF BREAST CANCER INCREASES AS WE GET OLDER.

Breast Screening uses a breast x-ray, called a mammogram, to look for cancer that may be too small to see or feel.

If you are registered with a GP practice and registered as female and aged 50 up to your 71st birthday we will automatically send you an appointment.

71+

If you are aged 71 or older you can still choose to have a mammogram but you are not automatically invited so you will need to call or email us to book an appointment.
